"December 2015, doctors had suggested a surgery as i had gall bladder sludge. After taking couple of healing sessions with Gauri Bhatia, my reports in February 2016 were totally clear and i did not need a surgery.

Along side with the sludge, I had PCOD and severe acidity. I was on antacids which caused increase in prolactin which in turn led to breast secretion. After healing sessions, my acidity, surprisingly also disappeared which in turn helped me to stop my antacids which stopped my breast secretion.

Overall my Health has improved and I definitely recommend Pranic Healing for overall physical, mental and emotional health."

What is Pranic Healing?

Pranic Healing is an energy “no-touch” healing system based on the fundamental principle that the body has the innate ability to heal itself. Pranic Healing utilizes *life force, energy or prana* to accelerate the body's inborn ability to heal itself. It is practiced by hundreds of thousands across the world.

Pranic Healing is a therapy in which the practitioner uses energy or life force to balance the bodily functions and thereby improve health. Its influence is not confined to improving physical health, but includes many aspects of life including relationships, finances and self-actualization.

Pranic Healing principles state that physical ailments are in direct relation to disruptions of prana in the energy body. By using this form of healing, we can create harmony, balance, and transformation in both the energy body and the physical body.
